

FEMME

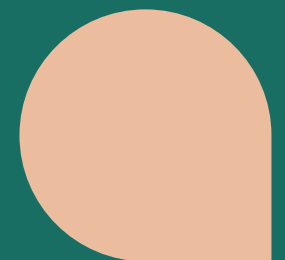

AIM

Make sure that emergency contacts are available easily

Include an emergency SOS button

Try and include a feature to point out that the passenger is taking a wrong route(if possible)

**Rough
prototype**

pop up menu button

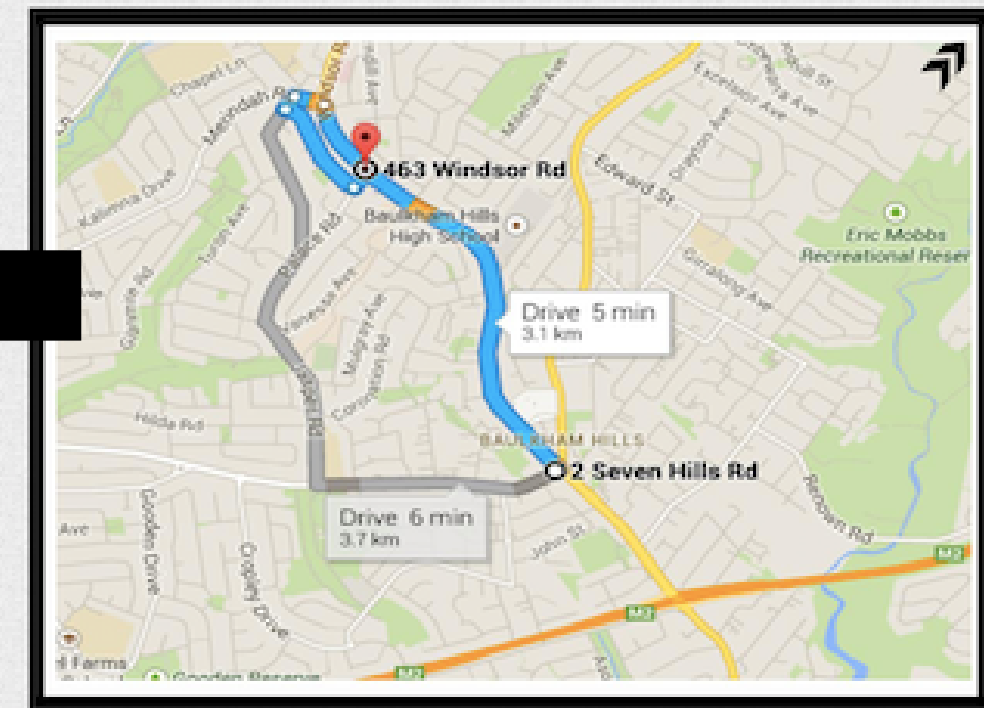

the user enters the destination in this sot.

Destination

SOS

Google maps included

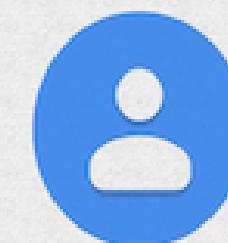

two contacts as per the users choice can be updated

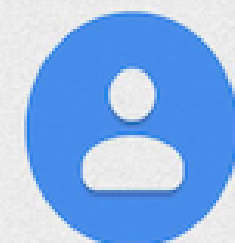

standard police number included as well
by the click of the button, a call goes to the respective number(directly)

100

Police

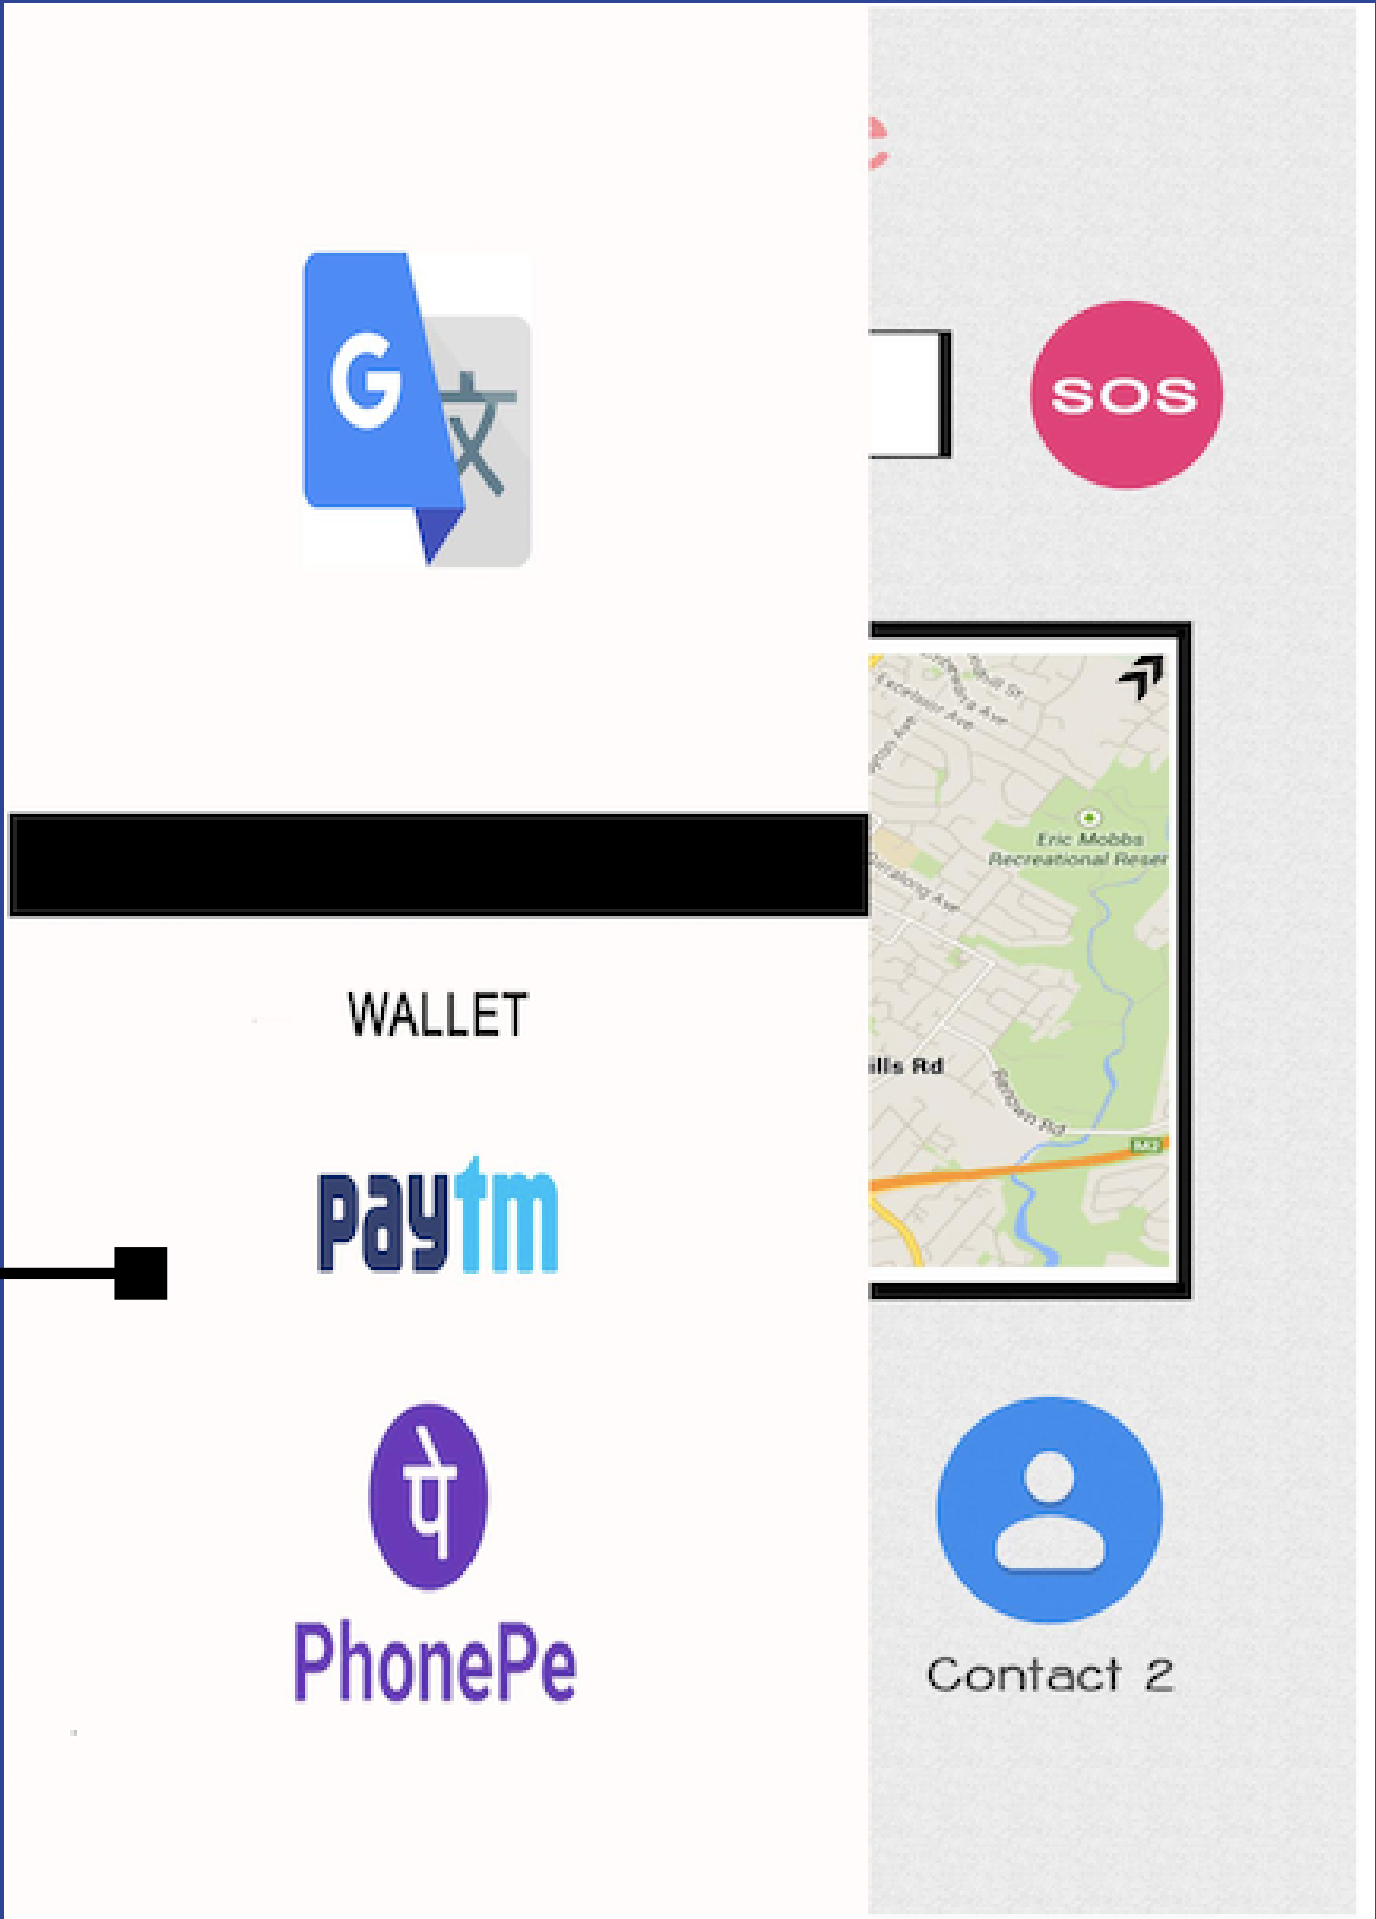

Contact 1

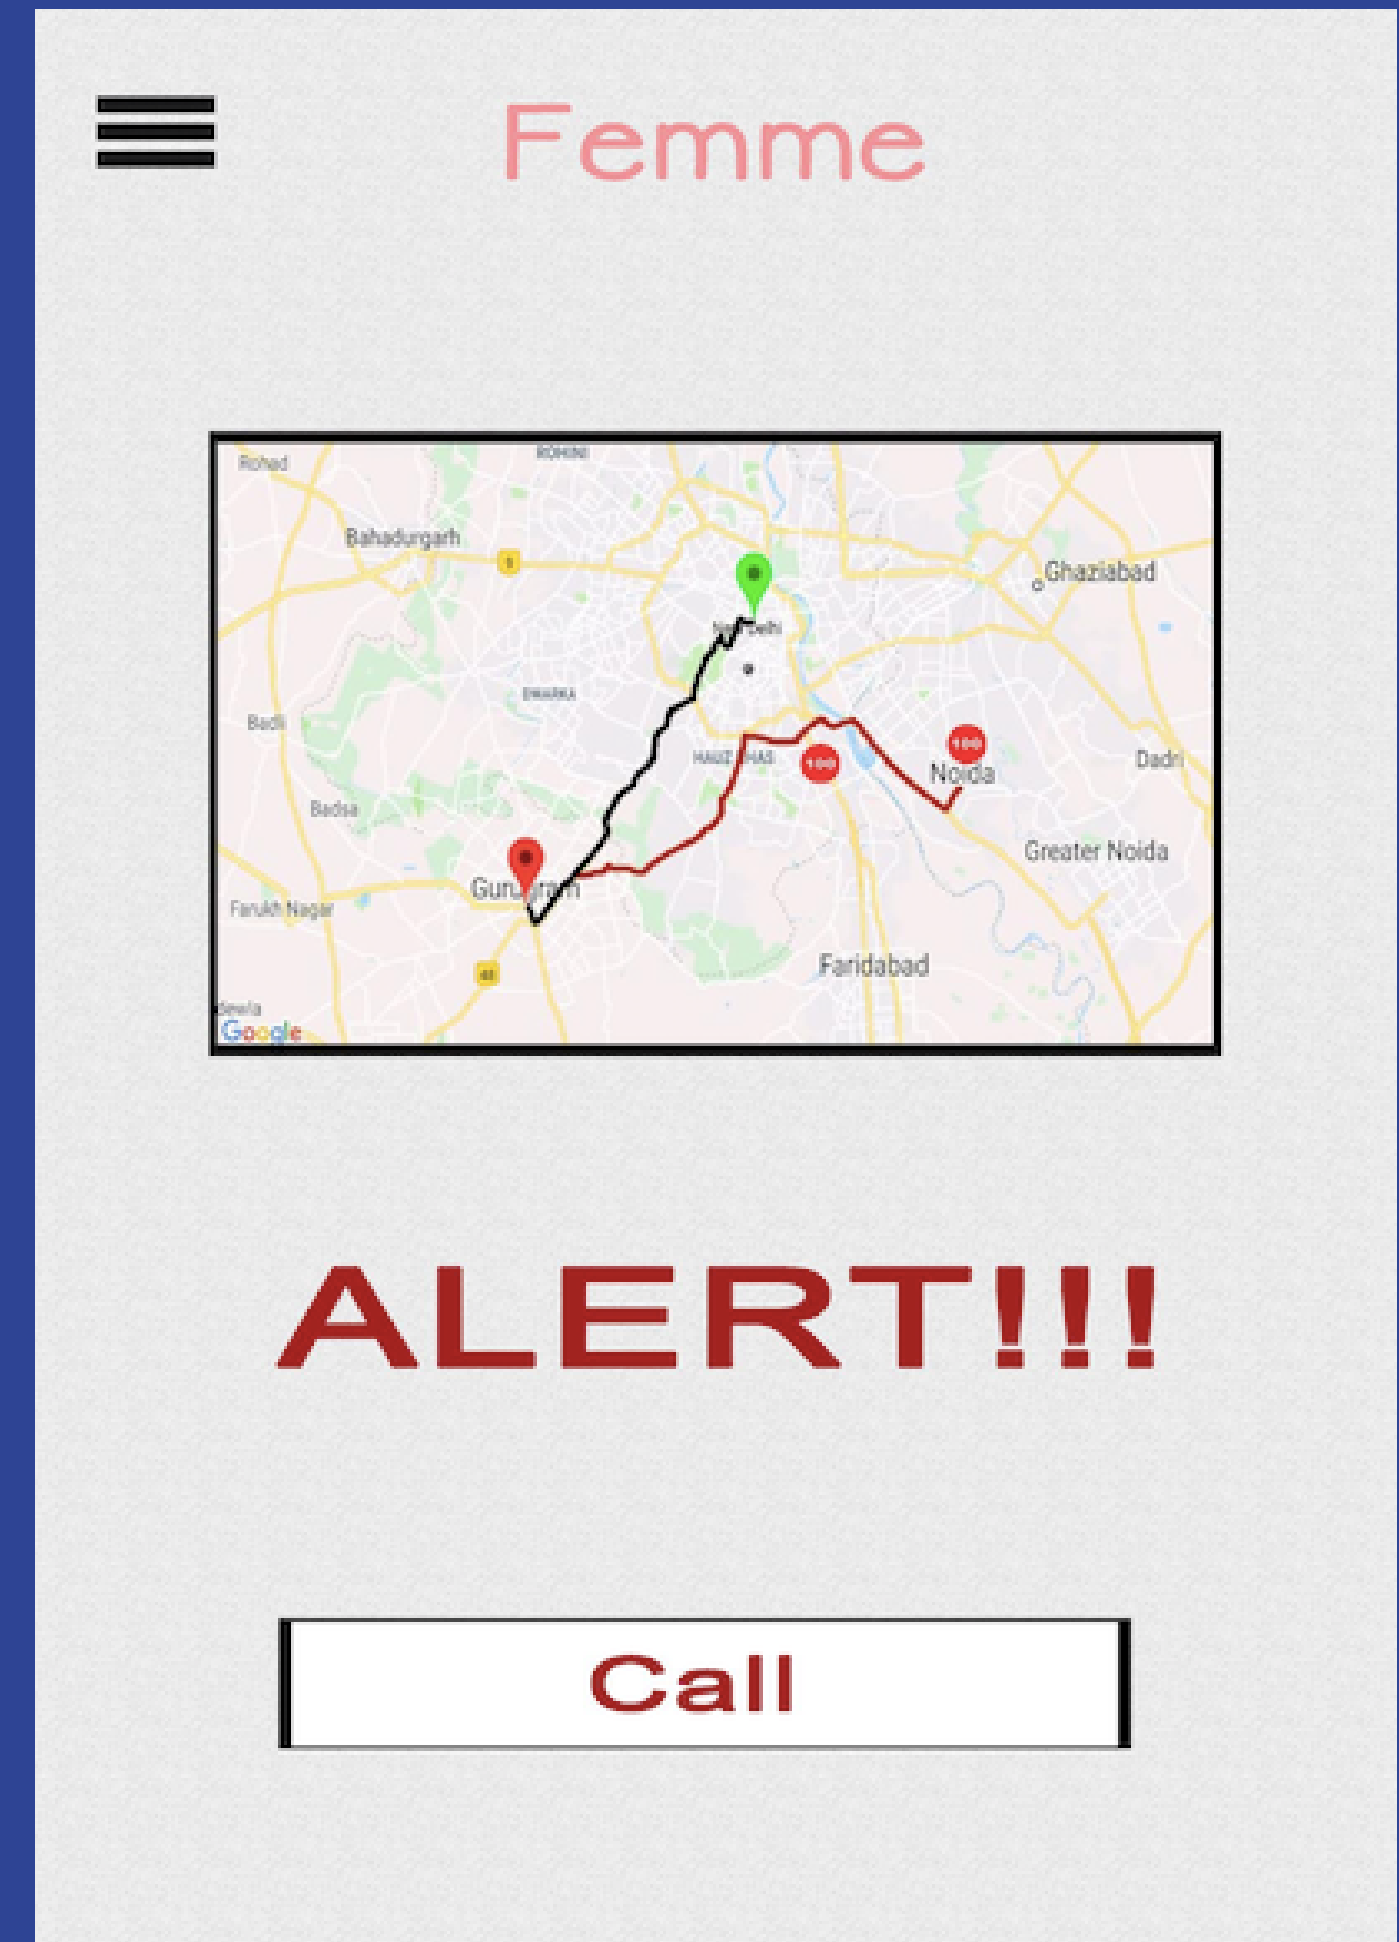

Contact 2

E wallets which are directly linked to the app

(if possible)

the black line shows the actual distance as per entered in the destination slot by the user. The red line shows the wrong way taken. The red spots shows the nearby police stations

What is needed?

Google maps API

**Flutter Plugin for In-App
Payments SDK**

**flutter plugin to
link contacts**

teams of two or three

team 1

working on the
google maps api
(mapbox also is a
preferable option)

team 3

working on the
api that enables
e payment

team 2

working on
the api that
links contacts

team 2 and 3 will
probably finish
their tasks faster
than team 1 and
can join them later

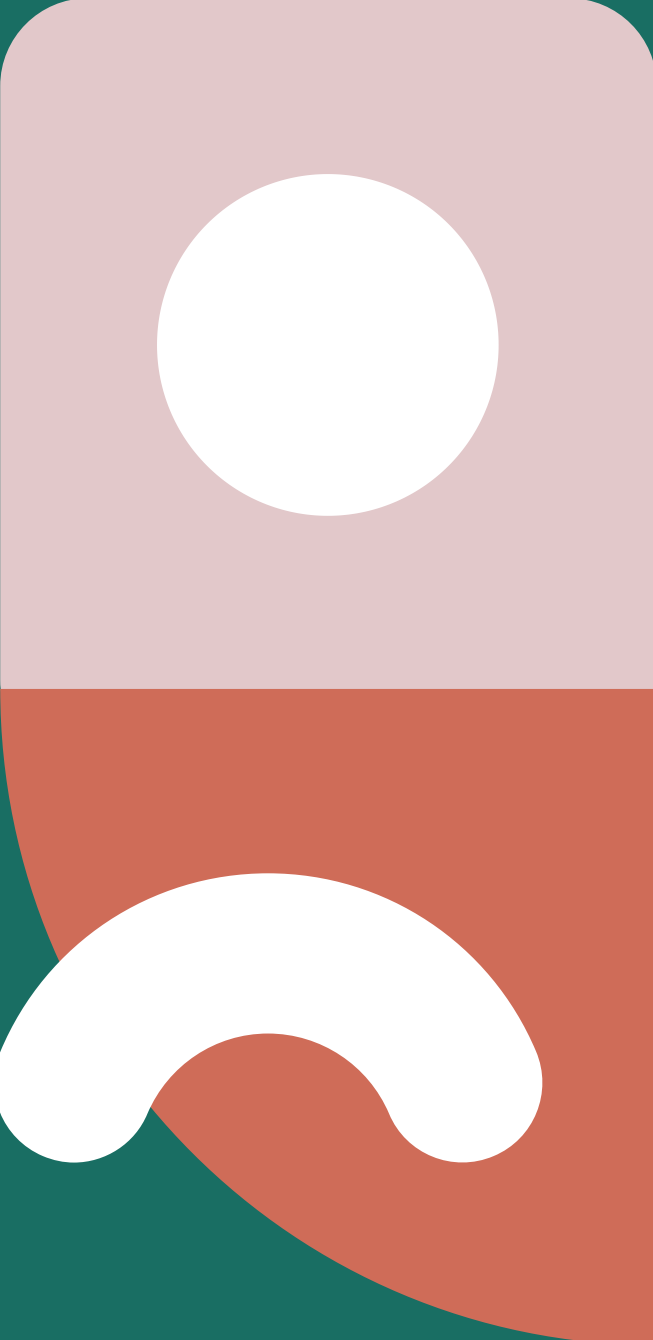

**Expected
date of
completion**

team 2 and team 3

by April end(internals and other ongoing college projects included)

team 1

mid week of May

UI can be
changed as per
convenience.
